

ANKIT MISHRA

Software Engineer | Full Stack & AI-Enabled Systems

Faridabad, Haryana, India | +91 83758-60588 | ankitm17.2001@gmail.com

LinkedIn: [linkedin.com/in/ankitmishra47](https://www.linkedin.com/in/ankitmishra47) | Portfolio: harukamirai.engineer

PROFESSIONAL SUMMARY

Software Engineer with **3+ years** of experience designing **enterprise applications, full-stack systems, and AI-assisted developer workflows**. Strong expertise in **Java** backend development, **Angular** and **PrimeNG** frontend engineering, **PostgreSQL** data modeling, **REST API** design, and **enterprise middleware**. Hands-on experience with **Retrieval-Augmented Generation (RAG)**, **vector embeddings**, **prompt engineering**, and **intelligent automation pipelines**. Proven contributor to enterprise integrations including **MYOB**, **CargoWise**, **XML/EDI processing**, and **production-grade automation systems**. Promoted from Intern to **Associate Senior Engineer** within 3 years and recognized as **Developer of the Year** at OneIT.

TECHNICAL SKILLS

Programming Languages: Java, TypeScript, JavaScript, Python, SQL, Bash

Frontend: Angular, PrimeNG, HTML5, CSS3, ReactJS, Responsive UI Design

Backend: Java, Spring Boot, REST APIs, JSON, XML Processing, Middleware Systems

AI and Machine Learning: AI-Assisted Code Generation, Prompt Engineering, Retrieval-Augmented Generation (RAG), Vector Embeddings, Large Language Model (LLM) Integration, AI Workflow Orchestration, Intelligent Automation

Databases: PostgreSQL, MySQL, Relational Database Design, SQL Query Optimization

DevOps and Tools: Git, SmartGit, Jenkins, Docker, Containerization, Linux, CI/CD Pipelines

Enterprise Integrations: MYOB, CargoWise, ERP Systems, Warehouse Management Systems (WMS), XML/EDI (Electronic Data Interchange) Workflows, File-Based Processing

Architecture: Microservices, Middleware Architecture, Automation Pipelines, Workflow Orchestration, Scalable System Design, Developer Tooling

Methodologies: Agile, Scrum, Code Review, Production Deployment, Debugging, Performance Tuning

PROFESSIONAL EXPERIENCE

Software Engineer / Senior Engineer | OneIT, Australia | July 2022 – Present

- Designed and developed **enterprise-grade applications** using **Java, Angular, PrimeNG, and PostgreSQL** within a proprietary enterprise framework, delivering production features for international clients.
- Built scalable backend services and **REST APIs** handling structured data exchange between **ERP**, warehouse, and logistics platforms.
- Engineered **XML, JSON, and EDI** processing pipelines for **enterprise interoperability** across distributed systems.
- Designed **AI-assisted developer workflows** that convert natural-language requirements into structured engineering plans, code scaffolds, and **automated test suites**, reducing manual development effort.
- Developed **Retrieval-Augmented Generation (RAG)** pipelines with **vector embeddings** to power intelligent code search, contextual retrieval, and AI-driven engineering assistance.

- Built **middleware systems** integrating **MYOB** accounting and **CargoWise** logistics platforms with ERP and warehouse systems via **XML, REST APIs, and file-based** data exchange.
- Implemented **automation pipelines** for code generation, validation, refinement, and testing orchestration, improving engineering productivity across the team.
- Led **debugging, root-cause analysis, and resolution** of production issues in distributed enterprise environments.
- Collaborated with **cross-functional teams** across product, QA, and operations to deliver production releases on schedule.
- Contributed to internal **platform engineering** and **developer tooling** adopted across multiple project teams.
- Promoted from **Intern to Associate Senior Engineer within 3 years** based on consistent technical impact and delivery.

KEY PROJECTS

AI-Assisted Engineering Workflow System

Tech Stack: *Python, Large Language Model (LLM) APIs, Retrieval-Augmented Generation (RAG), Vector Embeddings, Automation Pipelines*

- Architected an **intelligent workflow system** that converts plain-English requirements into structured engineering specifications, code, and automated tests.
- Built **RAG pipelines** integrating **vector embeddings** and context retrieval to feed project-specific context into **LLMs**, improving response relevance and reducing hallucinations.
- Designed **orchestration layers** for code refinement, validation loops, and AI-driven test generation, cutting manual planning and review cycles.

Enterprise Integration and Middleware Platform

Tech Stack: *Java, XML, JSON, REST APIs, Middleware Architecture*

- Developed **integration workflows** connecting ERP and warehouse systems through structured **XML/EDI** data exchange.
- Built **fault-tolerant middleware components** for asynchronous communication, retries, and error handling between enterprise platforms.
- Implemented **data transformation modules** ensuring schema compliance across multiple downstream systems.

MYOB and CargoWise Integration Automation

Tech Stack: *Java, XML, REST APIs, Integration Systems*

- Engineered automation between **MYOB accounting** and **CargoWise logistics** platforms, synchronizing financial and shipment data end-to-end.
- Designed **configurable mapping layers** for structured data exchange, reducing manual data entry and reconciliation.

The Sprachkraft — Language Institute Platform

Tech Stack: *Modern Frontend Architecture, Responsive Design*

- Built and deployed a **production website** (thesprachkraft.com) with modern frontend architecture, supporting public content delivery and lead capture for a language institute.

Personal Engineering Portfolio

Tech Stack: *Frontend Engineering, Static Site Architecture*

- Designed and shipped a portfolio (harukamirai.engineer) showcasing **AI engineering, automation systems**, and enterprise development case studies.

EDUCATION

Master of Computer Applications (MCA) — Chandigarh University | 2022 – 2024

Bachelor of Computer Applications (BCA) — GGSIPU, Dwarka | 2019 – 2022

ACHIEVEMENTS

- **Developer of the Year** — OneIT
- **Runner Up, Employee of the Year** — OneIT
- Promoted from **Intern to Associate Senior Engineer** within 3 years

CERTIFICATIONS AND LEARNING

- Java Programming
- AI Tooling and Prompt Engineering
- Full Stack Development
- Enterprise Integration Concepts
