

PROFILE

Software engineer building **enterprise-grade Java + Angular systems** and **AI-assisted engineering workflows** for international clients at OneIT (Australia). Owns features end-to-end across **REST APIs**, **PostgreSQL data modeling**, **PrimeNG** front-ends and **XML/EDI middleware**, and has shipped production **RAG pipelines** on **pgvector** at multi-million-row scale. Promoted from Intern to Senior Software Engineer and named **Developer of the Year** for consistent technical impact, production ownership and cross-team delivery.

TECHNICAL SKILLS

Languages	Java, TypeScript, JavaScript, Python, SQL, Bash	AI / LLM	RAG, vector embeddings, pgvector (HNSW), prompt engineering, LLM API integration, agentic code-gen & test-gen pipelines
Backend	Java enterprise framework, Spring Boot, REST API design , XML/JSON processing, middleware, async & retry patterns	Frontend	Angular , PrimeNG , HTML5/CSS3, Paper.js canvas, React, responsive UI
Data	PostgreSQL , MySQL, schema design, query & index tuning, VACUUM/bloat management	Integrations	MYOB , CargoWise , ERP & WMS, XML/EDI , SharePoint (Graph), Twilio, HaloPSA
DevOps	Git/SmartGit, Jenkins CI/CD , Docker , Linux, release management	Practices	Agile/Scrum, code review, root-cause analysis, production support, performance tuning

PROFESSIONAL EXPERIENCE

OneIT, Australia — Senior Software Engineer (promoted from Intern) Jul 2022 – Present • Remote

- Deliver production features on a **proprietary Java enterprise framework** with **Angular/PrimeNG** and **PostgreSQL** for international clients.
- Own **AI/RAG platform work** end-to-end: ingestion, **pgvector** search, LLM orchestration and AI-assisted developer tooling.
- Build **enterprise integrations** (MYOB, CargoWise, ERP/WMS) over **XML/EDI**, **REST** and file-based exchange.
- Lead **root-cause analysis** of production incidents and maintain **Jenkins** release pipelines for a cross-timezone team.
- Contribute platform engineering and developer tooling adopted across teams; work with product, QA and operations to ship on schedule.

KEY PROJECTS

AI-Assisted Engineering Workflow System • Python, LLM APIs, RAG, orchestration pipelines

- Converts plain-English requirements into **structured specs**, **code scaffolds** and **automated tests**; orchestration layer runs refinement, validation loops and AI test generation.
- Project-specific context retrieval feeds LLMs, **improving relevance and reducing hallucinations**; cut manual planning and review cycles for the team.

Enterprise Knowledge Retrieval (RAG) Platform • PostgreSQL, pgvector/HNSW, SharePoint Graph API, embeddings

- Built ingestion and sync of enterprise documents from SharePoint into a **25M+ row embeddings store** with chunking, filtered vector search and HNSW indexing.
- Diagnosed and fixed **index bloat**, **VACUUM stalls** and **orphaned-record drift**; wrote reconciliation tooling to keep file and vector state consistent.

Enterprise Integration & Middleware Platform • Java, XML/EDI, JSON, REST, async messaging

- Connected ERP and warehouse systems through **schema-validated XML/EDI exchange** and transformation modules serving multiple downstream consumers.
- Fault-tolerant middleware with **retries**, **dead-lettering** and **structured error handling** for asynchronous cross-platform communication.

MYOB & CargoWise Integration Automation • Java, XML, REST, configurable mapping

- End-to-end sync of **financial and shipment data** between accounting and logistics platforms via a configurable mapping layer, eliminating manual entry and reconciliation.

Service-Desk Automation Tooling • Twilio, HaloPSA, Chrome Extension (JS), Excel

- Implemented **Twilio-driven call workflows** and a Chrome extension that **auto-fills HaloPSA forms from Excel**, removing repetitive data entry for support teams.

Web Delivery • thesprachkraft.com (language-institute site, lead capture) • harukamirai.engineer (engineering portfolio)

EDUCATION

Master of Computer Applications (MCA) Chandigarh University	2022 – 2024
Bachelor of Computer Applications (BCA) Guru Gobind Singh Indraprastha University, Dwarka	2019 – 2022

ACHIEVEMENTS & CERTIFICATIONS

- Developer of the Year** — OneIT
- Runner-up, Employee of the Year** — OneIT
- Promoted **Intern → Senior Software Engineer**
- Certified: Java Programming • AI Tooling & Prompt Engineering • Full-Stack Development • Enterprise Integration
